EDUCATION

University of Massachusetts, Amherst
Bachelor of Science in Computer Science

Sep 2019 – May 2023

PROFESSIONAL EXPERIENCE

Choreo, LLC (Remote)
Full Stack AI Engineer

Aug 2025 – Present

- Engineered a real-time AI Virtual Try-On platform integrating the Decart AI Realtime API (`lucy_2_rt`) and WebRTC streaming, enabling live video-to-video garment transformation on camera feeds.
- Built an automated 3D clothing processing pipeline integrating headless Blender (`bpy` Python scripts) with Node.js to execute mesh transformations, normal recalculation, and GLB asset alignment for avatars.
- Developed interactive AI avatars using OpenAI, Gemini, and HeyGen streaming APIs for real-time interactions with celebrities and institutions (e.g., Michael Milken), powering 100+ live sessions.
- Implemented end-to-end RAG memory pipelines with vector embeddings and retrieval, refining workflows to improve response accuracy by 90% and enhance contextual memory retention.
- Built an Admin Dashboard used by internal teams to create/manage 10+ avatars, automate instruction updates, upload memory files, and streamline operational workflows.
- Developed a dataset evaluation platform handling 500+ user interactions, generating structured feedback and high-quality datasets for LLM fine-tuning.
- Designed and maintained containerized cloud infrastructure on AWS (EKS, ECR) using Docker and Kubernetes to support high-concurrency real-time AI workloads.

Consync Infra Pvt Ltd, Kolkata, India
Manager in Information Systems

Aug 2023 – Aug 2025

- Implemented ERP for labor tracking, inventory management, and data collection across 4+ construction sites, eliminating manual paper tracking and reducing reporting latency by 85%.
- Improved operational workflows by identifying bottlenecks, increasing field team efficiency by 15%.

Gamut Systems and Solutions, Kolkata, India
Database Management Intern

May 2022 – Aug 2022

- Executed automated ERP data migration pipelines for 5+ client projects with less than 1% system downtime.
- Evaluated database tools and delivered diagnostics that improved query performance by 20%.

SIDE PROJECTS

Seam – AI Healthcare Platform (Full Stack & AI)

2026 – Present

- Developed an AI-powered healthcare platform leveraging India's ABDM ecosystem to simplify medical record management and improve doctor-patient interactions.
- Integrated secure EMR/EHR data ingestion pipelines and LLM-assisted medical record summarization for rapid clinical insights.

Sampler Project (Circuits and Robotics)

Oct 2021 – Dec 2021

- Built a MIDI-controlled audio sampler using Arduino Nano, SD module, and audio hardware.
- Awarded **Best Project for 2022 in Manning CICS**.
